

Governor's Diversity, Equality and Equity and Inclusion Statement

Diversity

Diversity means including people of different ethnicities, genders, social backgrounds and abilities on governing boards. Having diversity of lived experience creates diversity of thought, allowing our school governors to engage in meaningful conversation about the needs of all pupils and staff. We aim for our Governing board to reflect and represent our local community, so everyone gets their voice heard.

Equality and Equity

Equality and equity are our key guiding principles. While equality refers to offering people the same opportunities, equity acknowledges people with different lived experiences need different things to access those opportunities. All our governors are equipped with this understanding, so they can make an impact on North Clifton Primary.

Inclusion

Our Governing board reflect and represents our local community.
